Medicine Storage Safety Choices

Directions: Choose the safest action for each medicine-storage situation.

1. You find two different pills mixed together in one bag with no label.

- ☐ Do not take them. Ask a trusted adult or pharmacist for help.
- ☐ Take one to see what happens.
- ☐ Put them in your pocket for later.

2. The bottle says keep out of reach of children.

- ☐ Store it in a safe place where children cannot reach it.
- ☐ Leave it open on the couch.
- ☐ Put it next to snacks on the table.

3. A prescription has an old date and is no longer needed.

- ☐ Ask how to dispose of it safely.
- ☐ Share it with a friend.
- ☐ Keep it in a cup by the sink forever.

4. The bathroom gets very hot and steamy after showers.

- ☐ Check if another cool, dry storage spot is better.
- ☐ Keep the medicine by the hot shower anyway.
- ☐ Store it on the floor.
