

Store Glasses in Their Usual Place

Foundational: follow a stated care plan

Use Kim's personal glasses routine below. This practice is about storing and finding glasses; follow individual care instructions for real glasses.

When removing	Put glasses in their protective case.
Usual place	Keep the closed case on the bedside shelf.
Before leaving	Check that glasses or their case are with Kim.
If the case is missing	Ask a support person to help look before packing.

Sample answers below. Accept equivalent wording and supported communication.

1. Where do the glasses go when Kim removes them?

In their protective case.

2. Where is the closed case kept?

On the bedside shelf.

3. What does Kim check before leaving?

That the glasses or their case are with Kim.

4. The case is missing. What is the next step in this routine?

Ask a support person to help look before packing.
