Share Place Settings Equally

Developing: divide small totals without remainders

A lunch club prepares three tables. Each table needs the same number of cups and the same number of napkins. Share all supplies equally; nobody receives food in this counting task.

Tables	3 tables
Cups available	12 cups
Napkins available	15 napkins
Sharing rule	Use every cup and napkin. Give each table equal amounts.

Read the information. Write, say, point to, or dictate your answers. A calculator may be used.

1. How many cups go on each table?

2. How many napkins go on each table?

3. Two tables have 4 cups each. How many cups are left for the third?

4. Check your cup answer by adding three equal groups.
